I graduated from the software industry in 2014 by studying Computer Program at Istanbul Gedik University.

After university, I took part in freelance projects.

Some of those :

- An application where they can manage the accounting transactions of a company that sells vehicle spare parts and follow the customer balances.

- An application that makes PDKS management

- Special reporting application for call center

Technologies we use when developing these projects.

ASP.NET , RESTfull ,C# , java , javascript , Html , Css , Visual Studio , GitHub ,MSSql

Afterwards, Casper Bilişim Sistemleri A.Ş. I worked as a technician in the hardware department of the company.

PROFESSIONAL EXPERIENCE

2021 – present

Freelance Programmer

I'm trying to improve myself
